## Research Services for the Arts, Humanities, Social Sciences, & Government Information

In addition to a comprehensive print and digital reference collection on the second floor of Peter J. Shields Library, the University Library offers Research Support Services in the arts, humanities, social sciences and government information and statistics. We invite you to get to know the subject librarian in your field (See verso.) Tell us about your research and teaching needs, and take advantage of our library instruction classes, our collections, and our other services.

### Subject Guides

Our librarians maintain web-based research portals to introduce you to the resources available in your field. Are you doing a literature review? Check out our Subject Guides: <http://www.lib.ucdavis.edu/ul/research/subjects/>

### Research Consultation Desk 2nd Floor Peter J. Shields Library 9am-6pm Mon- Thurs, 9-5 Fri.

Reference Librarians, trained in the social sciences, humanities, and government information are available at this location to help with class assignments, term papers and advanced research projects. **Drop by, no appointment needed.** Consultation desk email: [researchservices@ucdavis.edu](mailto:researchservices@ucdavis.edu)

### Research Appointments and Librarian Office Hours

Our Librarians are available to help with research projects. We can schedule anything from one-time meetings to sustained research alliances spanning the duration of the project. Tell us what you are working on so we can make sure the library is serving your needs.

### New Acquisitions and Book Requests

The Library works hard to provide the latest information to support the University's research and instruction. We are interested in hearing about advances and new directions in your fields of study. If you would like the Library to purchase an item important for research or instruction, please contact your subject librarian.

### Government Information and Social Science Data Services

Our librarians can also assist you with locating and identifying government-produced numeric and geographic data held by the library and cooperating institutions. We can provide assistance with available applications to help you identify and obtain data in support of research. Ask about the Library's new Data Management solutions.

### Open Access?

The University of California Faculty implemented a new Open Access Policy. Our librarians can help you learn more about it, and guide you through the changing world of Scholarly Communication.

<http://osc.universityofcalifornia.edu/open-access-policy/>

**Library Research Classes, Orientations, and Tours** We offer classes and tours throughout the year geared to introduce students to library research. Contact us to find out how we can help jump-start your students' research projects. We offer these classes in the library or in your classroom.
